Contact No: +8801906373908

Address: Kushtia, Khulna, Bangladesh

EDUCATION

Khulna University of Engineering & Technology
Master of Science in Computer Science & Engineering

Jul 2026 – Present
Khulna, Bangladesh

Bangladesh Army University of Engineering & Technology
Bachelor of Science in Computer Science & Engineering

Jan 2022 – Feb 2026
Qadirabad Cantonment, Natore

PROBLEM SOLVING ACTIVITIES

- Codeforces: (Dont_Cry), Highest Rating: 1430, Specialist, Problems Solved: 1080+.
- LeetCode: (Hafizahmed_789), Highest Rating: 1557, Problems Solved: 410+.
- Active Contributor: Regularly solve challenges on CSES, Beecrowd, HackerRank, and LightOJ.

I have solved over 1,800 data structures and algorithms problems and participated in 60+ online and 10+ LAN coding contests. [\[statistics\]](#)

ACHIEVEMENTS & AWARDS

- ICPC Dhaka Regional Preliminary 2024 (solved 3/8 problems) and 2023 (solved 2/8 problems).
- MIST LAN Contest (IDPC), solved 4 problems and ranked 23rd out of 84 teams.
- Champion at Mindstorm 5.0 (BAUET LAN Contest) among 70 teams, 1st Runner-up at Mindstorm 4.0 among 60 teams, and 2× Champion at Intra BAUET Programming Contest (BAUET LAN Contest).

EXPERIENCE

Backend Software Engineer | Chartered Life Insurance PLC (Sep 2026 – Present)

- Developing and maintaining backend applications using **C#**, **.NET**, and **ASP.NET Core**, with a focus on designing and implementing RESTful APIs, business logic, database integration, authentication, and backend services. Contributing to the development of secure, scalable, and maintainable software solutions while following clean coding practices, working with relational databases, and collaborating with the development team to deliver reliable application features.

Software Developer | Pentester Space (Feb 2026 – Aug 2026)

- Engineered secure, scalable backend services using **C#** and **ASP.NET Core**, applying the **Design Patterns** and core **System Design** principles, while implementing robust **API security** and real-time communication via **SignalR**.
- Optimized infrastructure and application performance by utilizing **Redis** for caching, **MinIO** for object storage, and **Hangfire** for background processing, alongside containerizing deployments with **Docker** and monitoring system health via **Grafana**.

Trainee | Brain Station 23 PLC (Jan 2025 – Feb 2025)

- Developed "VitaCraft", a dynamic CV generator web application, gaining practical experience in enterprise web development and scalable application building.
- Built using **ASP.NET Core** (Web API), **JavaScript**, Bootstrap, HTML/CSS.
- Applied **Repository Pattern**, **API security**, **rate limiting**, integrated email services.

PROJECTS

- OBE SOFT (Outcome Based Education) | C#, ASP.NET Core, MySQL, JavaScript** [\[Github\]](#)
Web-based solution that automates PO/CO mapping and result analysis for academic quality assurance, eliminating manual processes. Built with **ASP.NET Core** using a **modular monolithic architecture** and **Design Patterns**, applying **system design** principles. Includes secure **REST APIs** with **JWT authentication**, role-based access and **API rate limiting**. Real-time communication (**SignalR**), automated **OBE** reporting, caching (**Redis**), structured logging, and optimized queries for performance.
- Hall Meal Management System - BAUET | C#, ASP.NET Core, MySQL, JavaScript** [\[Github\]](#) [\[Demo Video\]](#) [\[Live Website\]](#)
Web-based solution for meal scheduling, automated cost calculation, notifications, and billing, field-tested at BAUET Hall for 3 months. Built with **C#**, **ASP.NET Core**, **EF Core**, **REST APIs**, **modular monolithic architecture**, and **Design Patterns**, applying **system design** principles. Includes **JWT authentication**, role-based access, **rate limiting**, real-time communication (**SignalR**), **Redis** caching, structured logging, **Docker**, and **CI/CD with GitHub Actions** for automated **VPS deployment** in production.
- VitaCraft - Dynamic CV Generator | C#, ASP.NET Core, MySQL, JavaScript, React, Typescript** [\[Github\]](#) [\[Live Website\]](#)
Engineered a dynamic CV Generator using **C#**, **ASP.NET Core**, and **React**, featuring real-time CV rendering, customizable templates, and consistent formatting. Developed a responsive live preview that updates instantly as users modify their information. Built with modular monolithic architecture and Repository Pattern, with **CI/CD** using GitHub Actions for automated deployment.

TECHNICAL & PROGRAMMING SKILLS

- Languages:** C, C++, C#, JavaScript (ES6+), TypeScript, Python.
- Backend & Databases:** ASP.NET Core (Web API), C#, MySQL, PostgreSQL, Redis.
- Frontend & Web:** HTML5, CSS3, Bootstrap, JavaScript, TypeScript, React.
- Tools & Platforms:** Git/GitHub, Docker, MinIO, Hangfire, Grafana, VS Code, Cursor, NPM, macOS.
- Core Competencies:** DSA, Competitive Programming, System Design, REST APIs, Design Pattern, Agile Development.

VOLUNTEER & LEADERSHIP EXPERIENCE

President, BAUET Computer Society (Jun 2025 – Nov 2025)

Organized **BAUET Techfair-2025** and multiple intra-university programming contests, managing event logistics, problem setting, and contest coordination. Guided junior students in C/C++, Data Structures & Algorithms (DSA), coordinating contests across LAN and online platforms.
